

ADVANCE
CORPORATION

Objective: Customer needs a years of service program for a municipal airport. Items need to be at increasing value to correlate with increased years of service.

Solution: Advance Corporation designed a series of coordinating awards to complement their corporate identity and unite their award program by selecting materials to maintain a common theme and reinforce their brand. Machined aluminum as a featured substrate for each award pays homage to airplanes and offers continuity. Our vibrant artglass is a perfect complement to their brand's color scheme.
